

EarthMonth®@OU 2019

Distinguished Speaker Katharine Hayhoe, Ph. D.

Accomplished atmospheric scientist, professor and director of the Climate Science Center at Texas Tech University. Hayhoe is recognized for her research on climate change, one of the most pressing issues facing humanity today, although she may be best-known for bridging the broad gap between scientists and Christians - work she does in part because she's a Christian herself. She's been named by Christianity Today as one of their 50 Women to Watch and currently hosts the PBS digital series, Global Weirding: Climate, Politics and Religion. Katharine has also served as a lead author for the Second, Third, and Fourth U.S. National Climate Assessments. Recipient of the National Center for Science Education's Friend of the Planet award, the American Geophysical Union's Climate Communication Prize, the Sierra Club's Distinguished Service award, and the Stephen H. Schneider Climate Communication Award, Hayhoe is also named one of TIME's 100 Most Influential People and Fortune's 50 World's Greatest Leaders.
